To the student

This book can really help you to increase your English vocabulary while having fun. Most of the tests cover a particular vocabulary area - for example, things in the kitchen, films and TV, IT and computers, business and industry, and so on. Others are based on word types - for example, prepositions, phrasal verbs or collective nouns. There are also tests on rhyming, words, words that sound the same and words that belong in the same group. Just choose the vocabulary area or word type you want to work on, and use the contents list to find the right test for you. Or simply choose a test because you like the look of the activity or the illustration on that page. So if you feel like doing a crossword, choose a crossword. If you feel like looking at cartoons, try one of the tests where you match a caption to a picture. Enjoying the tests is the surest way of learning new words fast. There's no need to start at the beginning and work through every test in the book. The tests at the end are no harder than the ones at the beginning.

There are tip boxes for many of the tests. Some point you to other tests in the same vocabulary area. Others give cultural information related to words on that page. There are also jokes, tips on ways to learn vocabulary, and notes on spelling patterns.

To get new words fixed in your mind, you will need to do each test more than once. So use a pencil to write the answers in the book when you test yourself. Then, when you've checked your answers and looked carefully at the words you didn't know or got wrong, you can rub out your answers ready for the next time you try that test. Each test will take you between five and fifteen minutes to do the first time, but the next time you do it you will probably be much quicker.

There is no progression in difficulty within each book. However, the five books in the Test Your Vocabulary series are carefully graded from Book 1, which is for beginners, to Book 5, which is for advanced students. If you find this book is too hard for you, try the next one down.

Good luck with learning the words in this book. And we hope you enjoy using the words in real situations once you've learnt them here.

Peter Watcyn-Jones and Mark Farrell

1 Animals

Write the number of the picture next to the correct word.

badger 4

hedgehog _____

slug _____

bat _____

mole _____

sparrow _____

deer _____

Quite a few animals keep their singular form for the plural, like *sheep* and *fish*. Most species of fish do the same: *salmon*, *trout*, *cod* and so on. Your dictionary should tell you irregular plural forms, so why not check the other animals on this list? Check out Test 35 for more practice with words to do with animals.

All the words in the list are countable except *travel*. That means that *travel* has no plural form, and cannot take the indefinite article *a* or *an*. It is used when talking about the general idea rather than a particular trip. For example, there is a proverb *Travel broadens the mind*. Do you agree with this proverb?

You may find in your dictionary that a *billion* means 1,000,000,000 in the USA and 1,000,000,000,000 in Britain. This is no longer true. As they often do, the British have fallen in line with American use. Well, someone had to change, as this kind of confusion could be dangerous. You need to do two things: one, learn that *a billion means a thousand million*; two, throw away your old dictionary and get a new one.

- 14 England's World Cup campaign is not going well. But all the criticism in the press has not helped the (*morals/morale*) of the team.
- 15 My new flat is just around the corner from the office, which is very (*convenient/comfortable*) for me.

The prefix *mis-*, as in question 7, does not simply form a negative like *un-*. It always bears a meaning of something wrong or incorrect. The commonest example is, of course, *mistake*. Whereas *undiagnosed* means 'not noticed by the doctor', *misdiagnosed* means 'the doctor said it was food poisoning but in fact it was appendicitis'. Think about the differences between these pairs of words: *unguided / misguided*; *unheard / misheard*; *uninformed / misinformed*; *unmatched / mismatched*.

Long passages of dialogue can be very repetitive if you keep using *he said*, *she said* over and over again. So exploit the words in this test to liven up your writing, and add variety. In speech, they are more commonly without quotes: *we complained about the rudeness of the staff* or with indirect forms: *she insisted that we should eat with them*.

In relative clauses, what do you do with all these prepositions? Do we say: *That's the number through to which I couldn't get?* No, definitely not. Everybody says: *That's the number I couldn't get through to.* Winston Churchill was once criticized for putting prepositions at the end of a sentence, and his reply was, 'This is the sort of English up with which I will not put.' (This, in case you don't know, sounds ridiculous.) Check out Test 4 for more practice with phrasal verbs.

22 Which horse won the race?

Here are the horses and betting odds for the 2.15pm race at Kempton Park:

There were only six finishers.

The horse that came second was an outsider (more than 20-1)

Lottery Lass came last.

So you will not be surprised that the language of the law is also rather antique, with very long sentences and bits of French and Latin thrown in.

Prepositions are among the most difficult bits of vocabulary to learn. They don't correspond very closely to prepositions in other languages, so they cause translation problems. It is not at all easy to sum up the 'meaning' of a word like *by*. We think first of its place use: *she's over there by the bar*. Then maybe of its use with agents: *he was chosen by the committee*. But there are also lots of phrases which don't fit into those two uses: *by night, bit by bit, by a long way, by name, by mistake and it's all right by me*. Check out Test 14 for more practice with prepositions.

Homophones, like the ones in Test 52, are words with different spellings but the same sound. The pairs of words in this test have the same spelling **and** the same sound; the technical term for such words is *homonyms*. Most homonyms are really just different uses of the same word; for example, the historian's *revolution* and the engineer's *revolution* are obviously related. 58 Crazy definitions

Match the words in the box to their rather unusual definitions.

vacuum cleaner warehouse woolly jumper

- 1 baby : Something with a noise at one end and a smell at the other.
- 2 _____ : Something possessed by people who laugh at your jokes.
- 3 _____ : Something that everybody wants to have read but nobody wants to read.
- 4 _____ : A broom with a stomach.
- 5 _____ : A sick bird of prey.
- 6 _____ : What you say when you are lost.
- 7 _____ : Where campers sleep.
- 8 _____ : A plum that has sunbathed too much.
- 9 _____ : Someone whose career is in ruins.
- 10 _____ : Shampoo for bald people.
- 11 _____ : Two chips and a pea.
- 12 _____ : Raw toast.
- 13 _____ : Someone who gets the sack as soon as he starts work.
- 14 _____ : A cross between a sheep and a kangaroo.
- 15 _____ : Someone who sees a half empty bottle and says it's half full.

Several of these definitions are based on word play or puns. That is the basis of much English-speaking humour. A girl says *I'm going to pick up my prints*, meaning *get my photos from the shop*; her friend says *Which prince is that – Prince William?* But beware: if overused, puns can become very irritating.

60 British and American English

Complete the table of British and American words using words/phrases from the box.

car park city centre ~~deck of cards~~ first floor
 first year undergraduate garden liquor store pacifier period
 postman shoestring term trainers vacation

AMERICAN ENGLISH	BRITISH ENGLISH
1 <i>deck of cards</i>	pack of cards
2 downtown	
3	ground floor
4 freshman	
5	off-licence
6 mailman	
7	lace
8 sports shoes	
9	full stop
10 yard	
11 semester	
12	dummy
13 parking lot	
14	holiday

Will American English take over in Britain? Probably not. Slang catches on quickly; a recent example is *no way* (*No way am I paying for you lot!*) But nobody in Britain is starting to say *sidewalk* instead of *pavement*, or *gas* instead of *petrol*, however many American films they watch.
